ABOUT OUR COMPANY

Aamod IT Solutions possess expertise in creation/enhancement of web applications development along with website design solutions.

The world is completely getting digitized and everything is available including bank transactions in few clicks from mobile device. Hence AamodIT Solutions is much ahead and readily available in creating top Android based mobile applications. That does not mean that we do not concentrate on iOS solutions. It can also create applications for iOS but gives preference to hybrid model of Mobile applications adopting with latest technology.

So far, AamodIT Solutions had completed 250 successful projects and by adapting with the latest technology on web/mobile development. By following latest concepts and standards it is been continuously possible for AamodIT Solutions to deliver high performance solutions and with the short turnaround time.

AamodIT Solutions excels in Quality analysis and testing. They have their own standards and guidelines for testing. This organizational realized the importance of testing for successful delivery of applications. Every application created with by AamodIT Solutions will be verified and certified by quality adherence experts. The principle of the organization is to deliver applications with high quality in all aspects like User Interface design, Performance, scalability and robustness of the application. The testing aspects of the application development is also automated for few of the general scenarios to ensure that the quality is not compromised even with small human errors.

The organization follows the unique way of delivering to the end customers by engaging them in timely demos right from development phase. Since the organization deals with lot of frontend/User Interface modules it is necessary to keep the customers updated with the right set of design decisions on the application.

[Let's Discuss Your Project](#)

OUR SERVICES

WEBSITE DEVELOPMENT

Aamod Itsolutions is dedicated to providing customers with the greatest web design, development, and marketing services possible so that they can get the most out of their online platform.

We have a talented team of designers and developers who are well-versed in cutting-edge technologies like as Laravel, Codeignator, CakePHP, NodeJS, and AngularJS. Our teams enable us to create a unique, user-friendly, and dependable website for you.

MOBILE APP DEVELOPMENT

Currently, the iPhone market in India is expanding, and it is regarded as the second largest platform for mobile application development. Android IT Solution offers highly competent, qualified, and trained developers who follow all of the above procedures and design your customised application to fit your requirements.

DIGITAL MARKETING

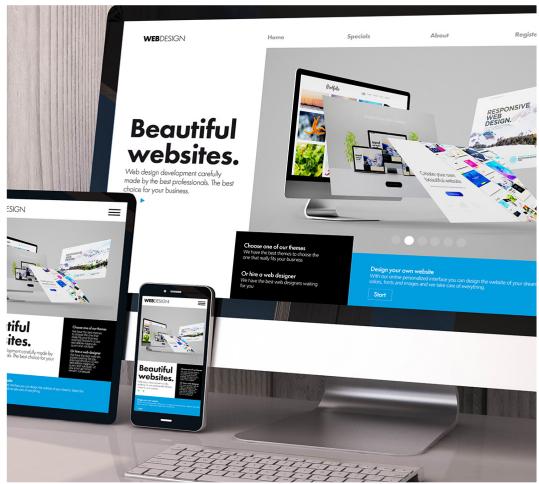

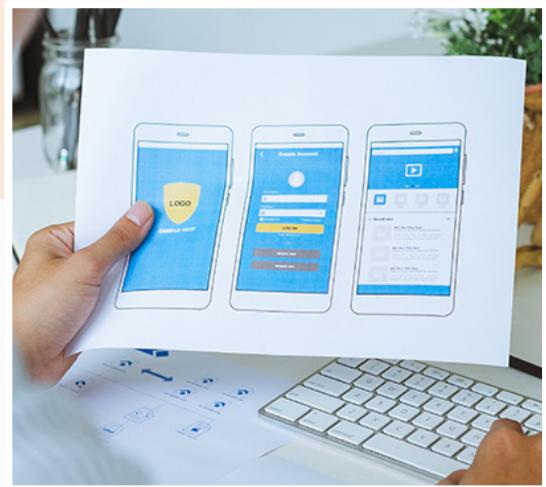

Our client receives a full variety of digital marketing services from us. As we all know, in today's environment, having an online platform is critical for business growth, developing brand value, and attracting new clients.

We offer the best digital solutions to help you get the most traffic to your website by utilising multiple media such as SEO, PPC, Email Marketing, Social Media Marketing, Google AdWords, and PPC.

UX/UI DESIGN

Design is crucial in the development of any product. We offer bespoke, one-of-a-kind, and user-friendly user interface designs for online and mobile applications, as well as responsive website design. Our expertise has shown that a potential developer can transform a client's dream of web design into a reality. We feel that delivering a project to a client on time is critical, as timelines are crucial for any project. What questions do you have in mind when you visit a website?.... It should be appealing, user-friendly, engaging, and educational.

RESPONSIVE WEB DESIGN

Responsive web design is the process of optimising a layout to meet the needs of customers in terms of platform, resizing, and orientation.

When a user switches from a laptop to a mobile device, or from Android to iOS, the website will immediately resize, pall, and script. In other words, we might claim that the website responds to the preferences of the customer.

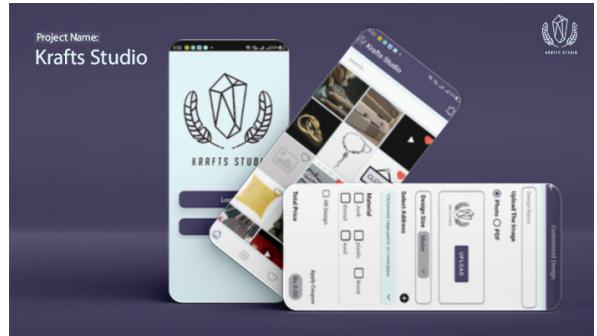

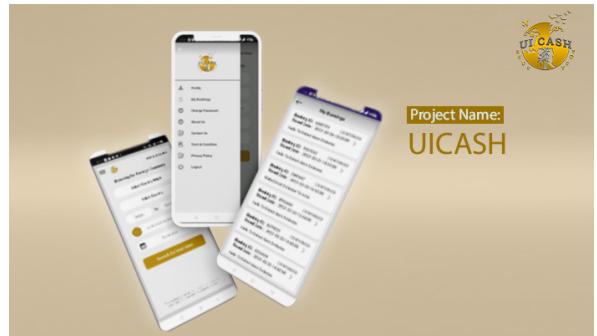

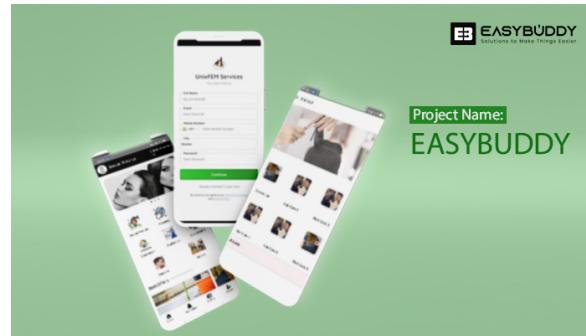

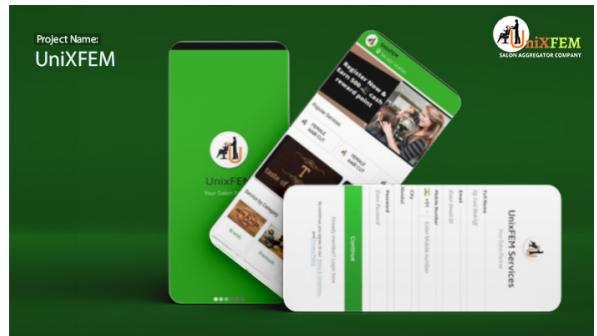

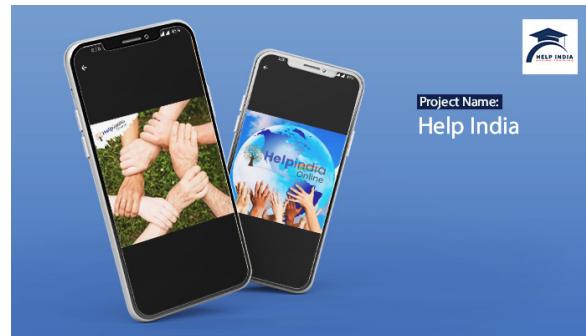

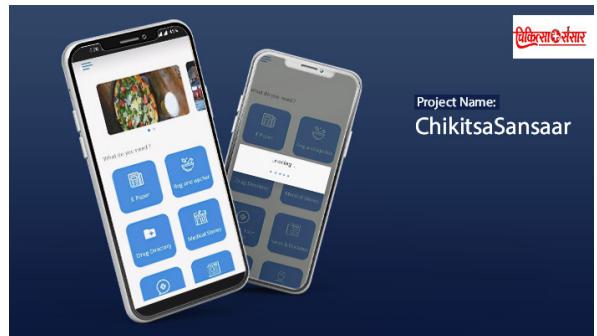

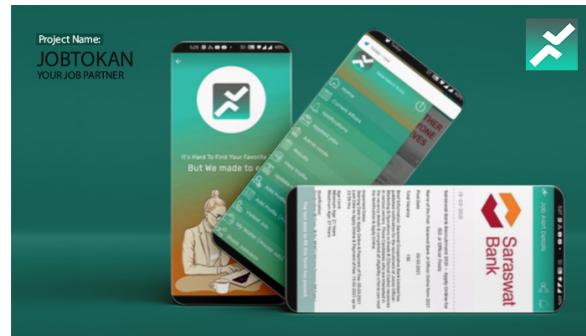

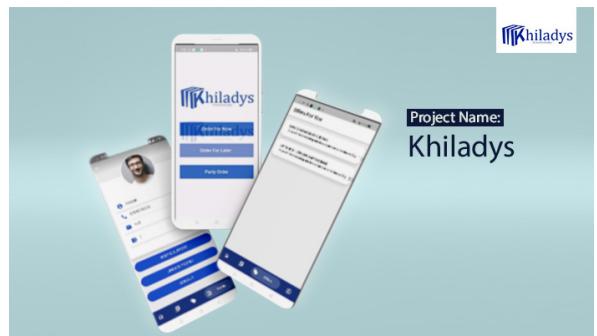

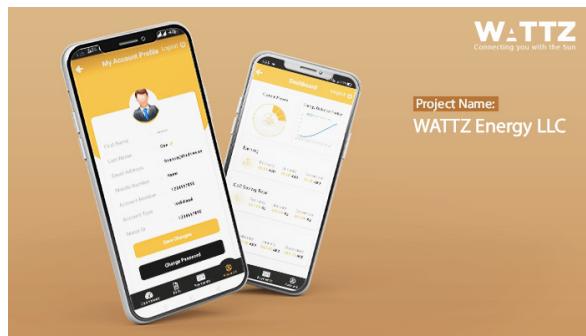

QUALITY ANALYSIS AND TESTING

The final stage of the product development process is quality assurance and testing before it goes live. What is the significance of this? In order to ensure that apps are bug-free and run smoothly.

We have a qualified testing team that will find any flaws or defects in any product and report them to the developer for correction.
